Sublime®

Water-based descaler

Your benefits at a glance

- Has a pleasant sassafras odor
- Contains a pale yellow colored dye which changes to a purple color when the solution is spent
- Will remove approximately 1.5 pounds of lime and water scale per gallon of solution

Your requirements - our solution

Summit Sublime® is a water-based descaler containing wetting agents, corrosion inhibitors and degreasing compounds. It is designed to penetrate and remove encrusted lime scale, corrosion products, rust, and dirt from water-wetted surfaces in equipment. The solution removes lime scale in commercial and industrial applications without costly disassembly. Sublime® is non-toxic, non-corrosive and non-flammable. NSF A-3 Registered.

Application

- Power plant boilers, piping systems, evaporating equipment
- Equipment in refineries, utility companies, paper mills, chemical plants, foundries and other industries
- Sewage disposal plants, water treating facilities, and other municipal water handling operations
- Any equipment that is water contacted in any manner

Application notes

Sublime® is not recommended for use in aluminum, aluminum alloys, zinc (hot dipped galvanized sheet), and all alloys of magnesium. It is recommended that test samples of these metals be evaluated in the laboratory before using Sublime® to treat water scale deposits on these metals.

Concentrated Sublime® solution may discolor some chromed and stainless steel surfaces. It is recommended to diluted 1:1 with water before using on chrome surfaces.

Material safety data sheets

Material safety data sheets can be requested via our website https://www.klsummit.com. You may also obtain them through your contact person at Summit Lubrication.

Characteristics	SUBLIME
Article number	349081
Boiling point	214 °C
Flash point	none °C
Pour point	-30 (freeze) °C
Minimum shelf life from the date of manufacture - in a dry, frost-free place and in the unopened original container, approx.	36 months

The data in this document is based on our general experience and knowledge at the time of publication and is intended to give information of possible applications to a reader with technical experience. It constitutes neither an assurance of product properties nor does it release the user from the obligation of performing preliminary field tests with the product selected for a specific application. All data are guide values which depend on the lubricant's composition, the intended use and the application method. The technical values of lubricants change depending on the mechanical, dynamical, chemical and thermal loads, time and pressure. These changes may affect the function of a component. We recommend contacting us to discuss your specific application. If possible we will be pleased to provide a sample for testing on request. Klüber products are continually improved. Therefore, Klüber Lubrication reserves the right to change all the technical data in this document at any time without notice.
